

ERC STARTING GRANT COMPETITION 2007

Results -Last Update: 15 February 2008

The list below ("priority list" - 201 proposals in [alphabetical order](#) - and "reserve list" - 229 proposals in [rank order](#)) shows the results of the first ERC Starting Grant competition. Names of Principal Investigators (PI) are included when they have given the ERC their permission to do so. The list includes all proposals meeting the ERC's threshold of excellence.

The "priority list" will be funded using the published budget to the call. However in view of the high demand additional budget is being made available which should allow a substantial number of proposals from the "reserve list" to be funded. These proposals will be funded in [rank order](#) until the available budget (still to be confirmed) is exhausted. The ERC expects roughly 300 proposals overall to be funded.
