

Template 1: Thematic summary per land (element (a) management summary)

Notes:

In the following chart, state which themes each programme covers and which countries and Southern partners will be involved.

If your application concerns a global programme you are not required to complete the chart for the global part of your application. You are, however, required to make a convincing case for why your programme qualifies as a global programme.

You should submit the following chart as compulsory appendix number 1.

NB: You may not change the format of the chart.
