Inondation et Urbanisation : Ennemi ou Ami ?

Colloque organisé par la VILLE D'ORLÉANS dans le cadre du FESTIVAL DE LOIRE et
du PROJET EUROPÉEN « FLOODRESILIENTCITY »

Objectifs :

Depuis quelques années une nouvelle approche de la gestion du risque inondation émerge. Il s'agit du développement de la résistance des territoires au risque par l'adaptation des structures, de l'aménagement et des modes de vie. L'objectif est de se mettre en capacité d'assurer un retour rapide à la normale après une catastrophe majeure, sans entamer mais plutôt en améliorant le potentiel de développement de la ville ou du territoire.

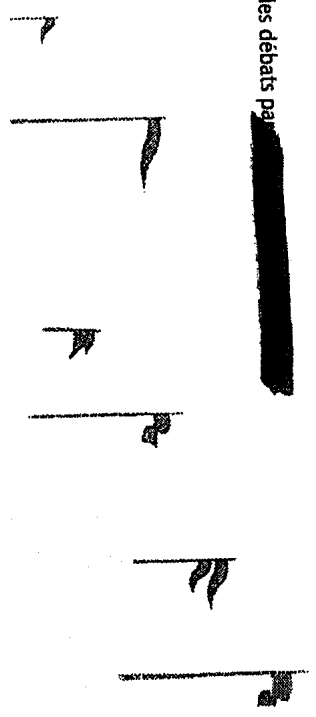

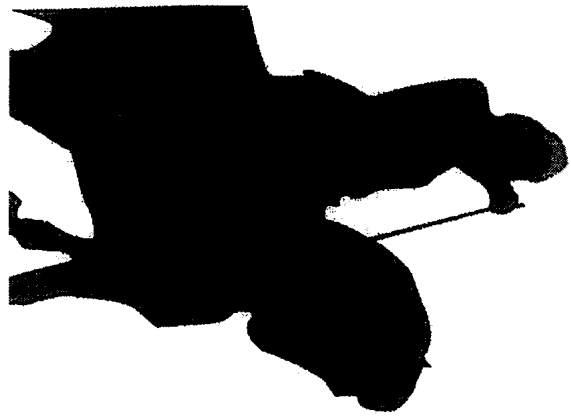

Ce colloque permettra de débattre et d'échanger sur des expériences étrangères et françaises novatrices conciliant urbanisme et risque inondation.

Programme

09:00	Accueil
09:30	Ouverture de la manifestation par  Député du Loiret, Maire d'Orléans
09:45	Mise en perspective « Inondation et Urbanisation »  - Directeur du Centre Européen de Prévention du Risque Inondation
10:00	Risque Inondation Retour d'expériences sur la catastrophe de la Nouvelle Orléans : Quelles leçons tirer d'une urbanisation non résiliente ?  Consultant
10:45	Retour d'expériences sur les inondations de l'été 2007 en Angleterre : Que nous apprend le rapport Pitt sur l'aménagement du territoire ?  Pennine Water Group, University of Sheffield
11:30	Comment concilier aménagement durable du territoire et risque d'inondation ?  Député du Loiret, 1 ^{er} Maire Adjoint d'Orléans
12:15	Synthèse des débats par 
12:30	Déjeuner libre
14:00	Tout est-il indemnisable ? Les assureurs comme partenaires des villes dans la prévention des inondations (sous réserve)
14:30	Réalisation de projets novateurs : <ul style="list-style-type: none">● Projet « Zolihafen », Ville de Mayence, Allemagne● Urbanisation dans un ancien port fluvial de façon résiliente à l'inondation  Stadtwerke Mainz AG● Projet du Rijkswaterstaat, Ville de Nijmegen, Pays-Bas : Combinaison de la prévention du risque inondation et de l'expansion urbaine  . Directeur du Programme « Room for the River »● Projet d'urbanisation en zone inondable d'une grande ville de France Association des Maires des Grandes Villes de France – AMGVF
16:45	Synthèse des débats par 
17:00	Clôture

ACCÈS GRATUIT.

Traduction simultanée : Français et Anglais.

Le projet FRC :

La Ville d'Orléans est partenaire du projet européen INTERREG « FloodResilientCity » : villes et territoires résilients vis à vis de l'inondation. Ce projet associe 6 pays partenaires : Belgique, Allemagne, Angleterre, Irlande, Pays-Bas, France. Il permet une coopération transnationale sur la thématique de la résilience inondation pour la période 2007-2012 : chaque partenaire peut comparer ses pratiques et créer les conditions nécessaires pour développer ensemble des approches innovantes pour la maîtrise du risque inondation.
