

Technical Data Sheet

Product Group	Epoxy primer		
Characteristics Product Information	This low VOC two-component epoxy primer exhibits excellent corrosion resistance with good flexibility and chemical resistance.		
Components Curing Solution Thinner	Curing Solution: EC-213 Optional Thinners: TR-114* or TR-49** * TR-114 is a VOC compliant thinner and may be used where VOC legislation permits. ** TR-49 is a MIL-T-81772B, TY II thinner and may be used where VOC compliance is not required. The use of TR-49 will raise the VOC.		
Specifications Qualified Product List	EADS (CASA)Z-12.140/MIL-P-23377 Ty ILockheed MartinG37.5472Rolls Royce (Omat)07-138US MilitaryMIL-PRF-23377 Type I, CI C2For most recent up-date or missing specifications please check the qualified product list (QPL) on www.akzonobel.com/aerospace		
Surface Conditions Cleaning	- Surface pretreatment is an essential part of the painting process. Follow the specification requirements for cleaning and pretreatment application.		
Instruction for Use			
Mixing Ratio (volume)	3 parts Base 10P20-13 1 part Cure Solution EC-213 0-1 part Optional Thinner: TR-114 or TR-49 - Stir or Shake until all pigment is uniformly dispersed before adding curing solution. - Stir the catalyzed mixture thoroughly

Induction Time	30 minutes		
Initial Spraying Viscosity (25°C/77°F)	Mixed and unthinned: 21 – 30 seconds 4 mm ISO Cup 12 – 16 seconds #4 Ford Cup The uses of Ford Cups for viscosity are requirements of the referenced specifications, and the ISO Cup measurement is provided only as a reference for field application. They are not provided as quality control values. Actual values will vary when tested outside of standard conditions		
Note	(25°C/77°F) Viscosity measurements are provided as guidelines only and are not to be used as quality control parameters. Certified information is provided by certification documentation available on request.		
Pot life (25°C/77°F)	4 hours.		
Dry Film Thickness (DFT)	15 – 23 micron (μm) 0.6 – 0.9 mils		
Application Recommendations	Standard suction, pressure pot, air assist airless, HVLP or electrostatic spray.		
Conditions	Temperature: 15 – 35°C 59 – 95°F Relative Humidity: 35 – 75%		
Note	The quality of the application of all coatings will be influenced by the spray equipment chosen and the temperature, humidity, and air flow of the paint application area. When applying the product for the first time, it is recommended that test panels be prepared in order to identify the best equipment settings to be used in optimizing the performance and appearance of the coating.

	Alternate Force			
	Cure	 There are two force cure conditions possible. 1. To determine sufficient cure to be able to handle and package components a. Induct mixed primer for 30 minutes b. Apply primer c. Air dry for one hour at 75°F (24°C) d. Force cure for 2-3 hours at 150°F(65°C) e. Allow parts to return to cool completely before packing or handling. 		
		The cure required for handling and packing will vary due to the efficiency of the oven being used (evacuating the solvent heavy air) and the amount of air movement in the oven. The customer should run tests to verify the required cure schedule.		
		 2. To determine sufficient cure to test the product for full cure properties a. Induct mixed primer for 30 minutes b. Apply primer c. Air dry for one hour at 75°F (24°C) d. Force cure for 24 hours at 150°F(65°C) e. Allow parts to return to cool completely before testing. 		
voc	Volatile Organic Compounds	340 g/l, mix ratio 3:1 with EC-213 340 g/l (per USA legislation), mix ratio 3:1:0.5-1 with EC-213/TR-114.		
		Where legislation permits > 340 g/l, mix ratio 3:1:0.5-1 with EC-213/TR-49

Storage	Store the product dry and at a temperature between 5 and 38°C / 40 and 100°F per AkzoNobel Aerospace Coatings specification. Store in the original unopened containers. Storage temperature may vary per OEM specification requirements. Refer to container label for specific storage life information.	
Shelf life 5 - 38°C (40 - 100°F)	12 months per AkzoNobel Aerospace for 10P20-13 and EC-213. 24 mont may vary due to OEM specification in for specific shelf life information.	e Coatings commercial specification hs for TR-49 and TR-114. Shelf life requirements. Refer to container label
Safety Precautions	Comply with all local safety, disposa Check the Material Safety Data She products carefully before using the p request.	I and transportation regulations. et (MSDS) and label of the individual products. The MSDS's are available on

Issue date: January 2015 (supersedes November 2011) - FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given is subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
